

Build a talk like software

manim-presentation-pipeline · 2026-10-01

An animated talk shows what slides can't.

2

Every change to an animation is code and a render.

3

```
class B1(Beat):  
    def construct(self):  
        queue = requests(6)  
        self.click(fill(queue))  
        self.play(warm(cache))
```

The same note costs more the later it lands.

Most notes land at the expensive end.

5

Check each decision where it's cheapest to change.

6

final

One sentence changes form at every stage.

8

results.md

The slowest waits halve once the cache is warm.

brief

digest

outline

script

visual

design

build

final

The digest copies it out, with its source.

9

#	claim	source
C3	The slowest waits halve once the cache is warm.	results.md

brief ✓

digest

outline

script

visual

design

build

final

In the outline, it is one beat with a time budget.

10

ID	type	spine line	time
B3	PEAK	The slowest waits halve once the cache is warm.	1:10

brief ✓

digest ✓

outline

script

visual

design

build

final

In the script, it is the line the speaker must say.

11

B3. The cache warms - 1:10

The slowest waits halve once the cache is warm.

> the bars of the slow requests shrink
